**DETAILED ACTION** 

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Hansmann,

WO 97/16,263.

Hansmann teaches a process for cleaning workpiece surfaces by using ultrasound and a

cleaning fluid (see abstract). An example of such a cleaning fluid comprises water, surfactants,

and builders (page 12, example). As this reference meets all material limitations of the claims at

hand, the reference is anticipatory. With respect to additional components claimed in claims 22-

29, the examiner notes these are optional components only.

3. Claims 17-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Chavannes,

GB 2,204,321.

Chavannes teaches biodegradable liquid detergent compositions (see abstract). The

invention includes a process for the ultrasonic cleaning of articles by immersing the articles in a

Art Unit: 1751

cleaning bath comprising water, surfactants, and builders (page 11, claims 1 and 14). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

4. Claims 17-34 are rejected under 35 U.S.C. 102(b) as being anticipated by DeSenna, US 5,529,788.

DeSenna teaches effervescent cleaning tablets for use in ultrasonic cleaning equipment (see abstract). An example of such a composition comprises surfactants and builders (col. 4, example). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

5. Claims 17-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Fuesting, US 4,448,750.

Fuesting teaches a process for sterilizing objects wherein an object is simultaneously subjected to a sterilizing liquid and ultrasonic radiation (see abstract). An example of such a sterilizing liquid comprises water, a surfactant, and carbamide (col. 10, claim 11). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

6. Claims 17-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Voit, US 4,308,229.

Application/Control Number: 09/831196 Page 4

Art Unit: 1751

Voit teaches a process for sterilizing objects wherein an object is simultaneously subjected to a sterilizing liquid and ultrasonic radiation (see abstract). An example of such a sterilizing liquid comprises surfactants and isopropanol (col. 7, claim 1). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

7. Claims 17-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Awad, US 5,464,477.

Awad teaches a process for cleaning ferrous surfaces wherein an object is subjected to an ultrasonically agitated cleaning solution (see abstract). An example of such a cleaning solution comprises solvents and surfactants (col. 8, example 4). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

8. Claims 17-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Motson, US 5,770,550.

Motson teaches a method for cleaning hard surfaces (see abstract). An example of such a method cleans a surface with a surfactant composition and ultrasonic energy (col. 12, claims 12, 14, and 15). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

Art Unit: 1751

9. Claims 17-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Tomaszewski, US 5,372,741.

Tomaszewski teaches a process for cleaning workpiece surfaces by using ultrasound and a cleaning fluid (see abstract). An example of such a cleaning fluid comprises water, surfactants, and builders (col. 5, example 2). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

10. Claims 17-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Kitazawa et al, US 5,350,457.

Kitazawa et al, US 5,350,457 teaches a process for cleaning workpiece surfaces by using ultrasound and a cleaning fluid (see abstract). An example of such a cleaning fluid comprises water, surfactants, and a buffer (col. 7, example 18). As this reference meets all material limitations of the claims at hand, the reference is anticipatory.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles Boyer whose telephone number is (703) 308-2524. The examiner can normally be reached on Monday-Friday from 9:30 AM - 6:00 PM.

If reasonable attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta, can be reached on (703) 308-4708. The fax phone number for this

Application/Control Number: 09/831196

Art Unit: 1751

Group is (703) 872-9310 for non-after-final amendments and (703) 872-9311 for after-final amendments.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 308-0661.
